PROFESSIONAL SUMMARY

Senior backend engineer with 8 years of experience designing and operating cloud-native services for logistics and connected devices. Experienced in distributed workflows, fleet telemetry, reliability, and on-call operations.

TECHNICAL SKILLS

Python, TypeScript, Java, PostgreSQL, MongoDB, Kafka, Redis, gRPC, REST, Docker, Kubernetes, AWS, Terraform, GitHub Actions, Prometheus, Grafana, OpenTelemetry

EXPERIENCE

Senior Backend Engineer — ParcelGrid | 2021–Present
Designed microservices for delivery orchestration and customer integrations. Built Kafka event pipelines processing 4M events/day. Implemented retryable workflows and idempotency for third-party APIs. Developed fleet KPI aggregation and Grafana dashboards; participated in 24/7 on-call rotation.

Backend Engineer — UrbanRoute | 2018–2021
Built Python and TypeScript APIs, PostgreSQL data models, and Redis-backed task queues. Deployed containerized services through CI/CD and improved availability through tracing and alerting.

PROJECTS

Fleet Health Monitor: Ingested robot status events, handled intermittent connectivity, and exposed operational KPIs through REST APIs.
Partner Delivery Integration: Implemented event-driven state machine for order handoffs and webhook retries.

EDUCATION

B.Sc. Computer Science — Technical University of Berlin, 2018
