PROFESSIONAL SUMMARY

Software engineer with 7 years in robotics-adjacent systems, embedded software, and real-time device communication. Strong C++ and IoT experience with limited ownership of backend microservices.

TECHNICAL SKILLS

C++, Python, ROS 2, MQTT, WebSockets, PostgreSQL, InfluxDB, Docker, Linux, GitLab CI, Prometheus, Grafana

EXPERIENCE

Robotics Software Engineer — MotionWorks | 2020–Present
Developed robot telemetry and device communication components. Built MQTT ingestion for intermittent connectivity and dashboards for device health. Collaborated with cloud engineers on fleet status APIs and incident investigations.

Software Engineer — SensorPath | 2017–2020
Implemented C++ services for sensor data processing, automated tests, and Linux deployment tooling. Supported field debugging for connected devices.

PROJECTS

Device Telemetry Gateway: Buffered and forwarded sensor events when connectivity returned.
Robot Diagnostics: Published device metrics for Prometheus and Grafana.

EDUCATION

M.S. Robotics — University of Washington, 2017
