PROFESSIONAL SUMMARY

Backend engineer with 6 years of experience building scalable services and data pipelines. Strong in Python, Java, cloud infrastructure, and production operations; interested in robotics and IoT platforms.

TECHNICAL SKILLS

Python, Java, SQL, PostgreSQL, DynamoDB, Kafka, RabbitMQ, REST, gRPC, Docker, Kubernetes, AWS Lambda, SQS, CI/CD, Grafana, Prometheus

EXPERIENCE

Backend Engineer — MetricLoop | 2022–Present
Built event-driven data processing services using Kafka and Python. Integrated external billing and identity APIs with retries, dead-letter queues, and monitoring. Created KPI aggregation endpoints and operated services in an on-call rotation.

Software Engineer — CloudLedger | 2019–2022
Developed Java microservices and REST APIs. Worked with PostgreSQL and DynamoDB, automated deployments, and improved observability using metrics and dashboards.

PROJECTS

Shipment Event Processor: Normalized partner events and produced delivery performance metrics.
Serverless Reconciliation: Used AWS Lambda and SQS to process asynchronous workflows.

EDUCATION

B.Tech. Information Technology — NIT Calicut, 2019
